

Understanding a rate sheet...

side 1

On the first page you can see the sender postal codes to which the current rate sheet applies.

Here you can see whether the rates apply to "Terminal to door" or "Door to door". Please note that there are different rates for consignments to Sweden or Slesvig/Holsten.

side 2

In the "Postnummer" (Postal code) column you can see the postal code to which the consignment is to be sent, for example 2500 Valby.

In the "Takstgruppe" (Rate group) column you can find the rate group used for postal code 2500. In this case, 6612.

side 3

On page three you will find an overview of weight ranges and prices. Here, you can select the weight of the current

consignment, for example 100 kg, and then find the rate group to be used, for example 6612. The price in this case is DKK 399.

side 4

On page four you will find a table, "Tillæg for særlige ydelser" (Surcharges for special

services). These prices are added as fee to each consignment.
